Projects

Professional

Swift Reader - Study Aide and Document Reader [Deployment Link](#) November 2022
An app that displays text from user input to allow users to read at over 5,000 words per minute
Tech Used: Friebase, React.js, Node.js, JavaScript, HTML, CSS, Google AdSense
•Created logic to convert documents into Swift Reader's display format and control cycle intervals
•Connected Google AdSense for monetization
•Implemented Front-End novel library and utilized Local Storage to bypass the need for a Data Base
•Designed and adapted the prototype to a functional Front-End app

Academic

Bad Bank - MIT Capstone Project [Deployment Link](#) October 2022
A full-stack single-page app that allows users to create accounts and exchange currency
Tech Used: MongoDB, Mongoose, Express.js, Node.js, React.js, JavaScript, HTML, CSS
•Created custom hooks in React.js and managed state through global context
•Built database in MongoDB Atlas
•Created RESTful API using Express.js
•Used JSON Web Tokens for security authorization managed through local storage
