Projects

Fire Watcher - Public Good Project

September 2022

An app that connects with Restful APIs and compares data to predict forest fires

- •Strived for accessibility throughout the entire development process
- •Used Axios to fetch API data
- •Wrote JavaScript that compares and connects data
- •Designed and adapted the prototype to a functional app with popular screen size breakpoints

Plant Here - AWS Sustainability Project Deployment Link

August 2022

An app that uses machine learning to compare soil and rainfall data to suggest optimal crops

- •Collaborated with a team to create agricultural sustainability app
- •Built mock-ups, and designed visuals
- •Used React.js and Node.js to build creative front-end functionality

Bad Bank - MIT Capstone Project Deployment Link

July 2022

A front-facing single-page app that allows users to create accounts and exchange currency

- •Created custom hooks in React.js and managed state through global context
- •Implemented REGEX for email authentication
- •Created login page with user verification functionality
- •Strove for accessibility by implementing screen reader functionality on forms
